NOMINATION AND REMUNERATION POLICY

This Nomination and Remuneration Policy is being formulated in compliance with Section 178 of the Companies Act, 2013 read along with the applicable rules thereto and Regulation 19 of SEBI (Listing Obligations and Disclosure Requirements) Regulation, 2015, as amended from time to time. This policy on nomination and remuneration of Directors, Key Managerial Personnel and Senior Management has been formulated by the Nomination and Remuneration Committee (NRC or the Committee) and has been approved by the Board of Directors.

Definitions:

“Remuneration” means any money or its equivalent given or passed to any person for services rendered by him and includes perquisites as defined under the Income-tax Act, 1961;

“Key Managerial Personnel” means:

- i) Managing Director, or Chief Executive Officer or Manager and in their absence, a Whole-time Director;
- ii) Chief Financial Officer;
- iii) Company Secretary; and
- iv) such other officer as may be prescribed. “Senior Managerial Personnel” mean the personnel of the company who are members of its core management team excluding Board of Directors. Normally, this would comprise all members of management, of rank equivalent to General Manager and above, including all functional heads.

Objective:

The objective of the policy is to ensure that

- the level and composition of remuneration is reasonable and sufficient to attract, retain and
- motivate directors of the quality required to run the company successfully;
- relationship of remuneration to performance is clear and meets appropriate performance benchmarks; and
- remuneration to directors, key managerial personnel and senior management involves a balance between fixed and incentive pay reflecting short and long-term performance objectives appropriate to the working of the company and its goals.

Role of the Committee:

The role of the NRC will be the following:

- To formulate criteria for determining qualifications, positive attributes and independence of a Director.
- To formulate criteria for evaluation of Independent Directors and the Board.
- To identify persons who are qualified to become Directors and who may be appointed in Senior Management in accordance with the criteria laid down in this policy.
- To carry out evaluation of Director's performance.
- To recommend to the Board the appointment and removal of Directors and Senior Management.
- To recommend to the Board policy relating to remuneration for Directors, Key Managerial Personnel and Senior Management.
- To devise a policy on Board diversity, composition, size.
- Succession planning for replacing Key Executives and overseeing.
- To carry out any other function as is mandated by the Board from time to time and / or enforced by any statutory notification, amendment or modification, as may be applicable.
- To perform such other functions as may be necessary or appropriate for the performance of its duties.

APPOINTMENT AND REMOVAL OF DIRECTOR, KEY MANAGERIAL PERSONNEL AND SENIOR MANAGEMENT

- a) The Committee shall identify and ascertain the integrity, qualification, expertise and experience of the person for appointment as Director, KMP or at Senior Management level and recommend his / her appointment, as per Company's Policy.
- b) A person should possess adequate qualification, expertise and experience for the position he / she is considered for appointment. The Committee has authority to decide whether qualification, expertise and experience possessed by a person is sufficient / satisfactory for the position.
- c) The Company shall not appoint or continue the employment of any person as Whole-time Director who has attained the age of seventy years. Provided that the term of the person holding this position may be extended beyond the age of seventy years with the approval of shareholders by passing a special resolution.

TERM / TENURE

- a) Managing Director/Whole-time Director:
The Company shall appoint or re-appoint any person as its Executive Chairman, Managing Director or Executive Director for a term not exceeding five years at a time. No re-appointment shall be made earlier than one year before the expiry of term.

b) Independent Director:

An Independent Director shall hold office for a term up to five consecutive years on the Board of the Company and will be eligible for re-appointment on passing of a special resolution by the Company and disclosure of such appointment in the Board's report.

No Independent Director shall hold office for more than two consecutive terms of upto maximum of 5 years each, but such Independent Director shall be eligible for appointment after expiry of three years of ceasing to become an Independent Director.

Provided that an Independent Director shall not, during the said period of three years, be appointed in or be associated with the Company in any other capacity, either directly or indirectly.

At the time of appointment of Independent Director it should be ensured that number of Boards on which such Independent Director serves is restricted to seven listed companies as an Independent Director and three listed companies as an Independent Director in case such person is serving as a Whole-time Director of a listed company or such other number as may be prescribed under the Act.

EVALUATION

The Committee shall carry out evaluation of performance of Director, KMP and Senior Management Personnel yearly or at such intervals as may be considered necessary.

REMOVAL

The Committee may recommend with reasons recorded in writing, removal of a Director, KMP or Senior Management Personnel subject to the provisions and compliance of the Companies Act, 2013, rules and regulations and the policy of the Company.

RETIREMENT

The Director, KMP and Senior Management Personnel shall retire as per the applicable provisions of the Act and the prevailing policy of the Company. The Board will have the discretion to retain the Director, KMP, Senior Management Personnel in the same position/ remuneration or otherwise even after attaining the retirement age, for the benefit of the Company.

POLICY FOR REMUNERATION TO DIRECTORS/KMP/SENIOR MANAGEMENT PERSONNEL

- 1) Remuneration to Managing Director / Whole-time Directors:
- 2) The Remuneration/ Commission etc. to be paid to Managing Director / Whole-time Directors, etc. shall be governed as per provisions of the Companies Act,

2013 and rules made there under or any other enactment for the time being in force and the approvals obtained from the Members of the Company.

The Nomination and Remuneration Committee shall make such recommendations to the Board of Directors, as it may consider appropriate with regard to remuneration to Managing Director / Whole-time Directors.

3) Remuneration to Non- Executive / Independent Directors:

- a) The Non-Executive / Independent Directors may receive sitting fees and such other remuneration as permissible under the provisions of Companies Act, 2013. The amount of sitting fees shall be such as may be recommended by the Nomination and Remuneration Committee and approved by the Board of Directors.
- b) All the remuneration of the Non- Executive / Independent Directors (excluding remuneration for attending meetings as prescribed under Section 197 (5) of the Companies Act, 2013) shall be subject to ceiling/ limits as provided under Companies Act, 2013 and rules made there under or any other enactment for the time being in force. The amount of such remuneration shall be such as may be recommended by the Nomination and Remuneration Committee and approved by the Board of Directors or shareholders, as the case may be.
- c) An Independent Director shall not be eligible to get Stock Options and also shall not be eligible to participate in any share based payment schemes of the Company.
- d) Any remuneration paid to Non- Executive / Independent Directors for services rendered which are of professional in nature shall not be considered as part of the remuneration for the purposes of clause (b) above if the following conditions are satisfied:
- e) The Services are rendered by such Director in his capacity as the professional; and
- f) In the opinion of the Committee, the director possesses the requisite qualification for the practice of that profession.
- g) The Compensation Committee of the Company, constituted for the purpose of administering the Employee Stock Option/ Purchase Schemes, shall determine the stock options and other share based payments to be made to Directors (other than Independent Directors).

4) Remuneration to Key Managerial Personnel and Senior Management:

- a) The remuneration to Key Managerial Personnel and Senior Management shall consist of fixed pay and incentive pay, in compliance with the provisions of the Companies Act, 2013 and in accordance with the Company's Policy.
- b) The Compensation Committee of the Company, constituted for the purpose of administering the Employee Stock Option/ Purchase Schemes, shall determine the stock options and other share based payments to be made to Key Managerial Personnel and Senior Management.
- c) The Fixed pay shall include monthly remuneration, employer's contribution to Provident Fund, contribution to pension fund, pension schemes, etc. as decided from to time.

d) The Incentive pay shall be decided based on the balance between performance of the Company and performance of the Key Managerial Personnel and Senior Management, to be decided annually or at such intervals as may be considered appropriate.

IMPLEMENTATION

- The Committee may issue guidelines, procedures, formats, reporting mechanism and manuals in supplement and for better implementation of this policy as considered appropriate.
- The Committee may Delegate any of its powers to one or more of its members.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. OVERVIEW OF THE ECONOMY

Global Economy

Global economy growth continued to stagnate following slow trades, low investments and policy uncertainties in advanced economies. Major global events during the year included United Kingdom's decision to leave the European Union and the outcome of presidential elections in United States of America both the events are expected to have long-term effects on the global economy. Global growth projected to grow at around 6.5% in 2018-19.

Growth in emerging markets and developing economies is expected to pick up in 2019 on the back of fiscal stimulus measures in developed economies and narrowing of divergence between commodity exporters and importers. The main factors that could possibly weigh on the medium-term growth prospects across many emerging markets and developing economies are weak investments, below par levels of productivity coupled with heightened policy uncertainty, and protectionist pressures.

Indian Economy

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 10 percent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry

24TH ANNUAL REPORT

has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

Market Size

The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020. The Indian Textile Industry contributes approximately 4 per cent to India's Gross Domestic Product (GDP), and 14 per cent to overall Index of Industrial Production (IIP).

The total area under cultivation of cotton in India is expected to increase by 7 per cent to 11.3 million hectares in 2018-19, on account of expectations of better returns from rising prices and improved crop yields during the year 2017-18.

The global trade in the apparel segment is expected to grow at a CAGR of 5% and the global textiles trade is projected to grow at a CAGR of 3% over 2016-26. Fabric is expected to lead the category, followed by yarns and fibre.

Currently, the domestic textiles industry contributes 10% to the manufacturing output of the country, generates about 4% to its GDP and employs more than 45 million people. Importantly, the sector contributes 15% to the export earnings of India. Mitigating the repercussions of currency fluctuation remains a challenge. Exports have been a core feature of India's textile sector. The Indian textiles export market, estimated at \$18 billion, is expected to grow at a CAGR of 4% compared to the global CAGR of 3% over 2016-26.

2. ANALYSIS AND REVIEW

Global textile and apparel industry

The global textile and apparel industry will continue to grow along with growing consumption of textile and apparel products in developing countries and a gradual economic recovery of major developed economies. Geography-wise, while the apparel market is still largely dominated by the European Union and the US, countries like China, India and Russia are emerging as future destinations for apparel consumption. The high growth in the market is expected to be primarily driven by the increase in population as well as per capita apparel spending of the already large population in these countries.

Given stronger than expected economic activity in 2017, the IMF has revised its growth forecast for the United States from 2.3% to 2.7% in 2018 and from 1.9% to 2.5% in 2019.

Indian Textile & Apparel Industry

Textile Industry:

The Indian textiles industry is one of the oldest industries of the country. The textile industry has two broad segments. First, the unorganised sector consisting of handloom, handicrafts and sericulture and the second is the organised sector consisting of spinning, weaving, knitting, garments and home textiles segment. The industry has a major contribution to the national economy in terms of direct and indirect employment generation and net foreign exchange earnings. The sector contributes 14% to industrial production, 4% to India's Gross Domestic Product (GDP) and 15% to the country's export earnings. It is the second largest employment provider in the country.

The company holds a dominant position in the Indian textiles market as a B2C branded player for suiting and shirting fabrics. In the Suiting, category, the company has been a prominent player since nine decades whereas in the Shirting business, it has become the largest OTC player in the organized shirting segment within two years of its launch.

Apparel Industry:

The domestic apparel market which is expected to grow at a CAGR of approx 9.7% over 2018-26 driven by increase in both the per capita consumption and the average spends on apparel. Currently, at 41% Men's wear is the biggest category in the Indian apparel market; however the rate of growth in women's wear and kid's wear has been rapid. It is estimated that, within another decade, the Women's wear category will rival the Men's wear.

The company is among the top three branded players in the menswear apparel industry in India with portfolio of four power brands namely Raymond Ready to Wear, Park Avenue, ColorPlus and Parx. These four power brands cater to the entire spectrum of men's wardrobe across various price points.

The up-gradation of technology in the industry has led to emergence of new trend of "Smart Garments". Currently, the wearable technology market mainly consists of wearable devices such as fitness bands, smart watches. But, recently there has been a shift towards smart garments among premium and luxury customers The Company is focusing on product innovations to make its products more relevant to today's consumer market. In last couple of years, it has launched many new and innovative products such as Techno smart, Techno stretch, light weight jackets, auto fit shirts and others.

Overall, the government has been supportive in encouraging textile industry in India. Many incentives and schemes have been announced in the Union Budget to promote the

24TH ANNUAL REPORT

sector. Further, introduction of GST is seen as positive step as it will result in 'Fibre-neutrality effect' on the sector. With the right government policies, we believe that the Indian Textile Industry is well poised to benefit from the large opportunity offered in the domestic and export market.

3. OPPORTUNITIES & THREATS:

Positive steps taken by the Central Government for the textile industry, from allocation of funds to giving extra rebate to exporters (mainly on made-ups) and various other benefits, are expected to improve investment in this sector and provide more business opportunities in the near future.

With increasing capacities of man-made fibres as compared to cotton, the preferred shift of the consumer to use products of man-made fibres i.e. viscose, polyester, polyamide, acrylic etc. and its blends, is expected. Presently in India, the consumption of textile products is approx 65% made of cotton and 35% made of man-made fibres as against the reverse trend overseas.

4. OUTLOOK:

The trend in India is also shifting towards use of man-made fibre products. In order to satisfy the taste of customers in future, we have developed innovative products with man-made fibre and its blends which have been appreciated and approved by the customers.

Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 (“the Act”) with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind-AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit.

In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the standalone Ind-AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind-AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company management, as well as evaluating the overall presentation of the standalone Ind AS financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone Ind AS financial statements.

Opinion

21 Capital Management

The Company's objective while managing its capital is primarily to safeguard its ability to continue as a going concern and to provide adequate return to its shareholders and benefits to other stakeholders and company trying to maintain an optimal capital structure to reduce the cost of capital.

The company monitors its capital structure by using debt equity ratio which is a financial ratio indicating the relative proportion of shareholders' equity and debt, used to finance company's assets. Closely related to leveraging, the ratio is also known as risk, gearing or leverage ratio. The company policy is to maintain adequate debt equity ratio.

22 Financial Risk Management Objectives and Policies

The Company's principal financial liabilities, other than derivatives, comprises of Loans, trade payables and other financial liabilities. The main purpose of these financial liabilities is to raise finance for the Company's operations. The Company has various financial assets such as trade receivables and cash & bank, which arises directly from its operations.

The main risks arising from the Company's financial instruments are liquidity risk and credit risk.

The Board of Directors review and agree policies for managing each of these risks which are summarised below.

Credit risk

Credit risk arises from the possibility that the counter party may not be able to settle their obligations. To manage trade receivable, the Company periodically assesses the financial reliability of customers, taking into account the financial conditions, economic trends, analysis of historical bad debts and aging of such receivables.

Financial instruments that are subject to such risk, principally consist of trade receivables & loans and advances. None of the financial instruments of the Company results in material concentration of credit risks.

Liquidity risk

Company monitor their risk of shortage of funds using cash flow forecasting models. These models consider the maturity of their financial investments, committed funding and projected cash flows from operations.

The Company's objective is to provide financial resources to meet its business objectives in a timely, cost effective and reliable manner. A balance between continuity of funding and flexibility is maintained through the use of credit facility received from vendors and internal accumulated fund. The company also monitors compliance with its debt covenants. The maturity profile of the Company's

1) CORPORATE INFORMATION

New Light Apparels Private Limited (the 'Company') is engaged in trading of Apparels. The Company is a public Limited company domiciled in India and is incorporated under the provisions of Companies Act applicable in India. The registered office and principle office of the Company is located in New Delhi. The company is listed in Bombay Stock exchange for its equityshare.

Compliance with Ind AS

The standalone financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time.

For all periods up to and including the year ended 31 March 2019, the Company has prepared its financial statements in accordance accounting standards notified under Companies (Accounting Standard) Rules, 2006 as amended, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 (Previous GAAP), These financial statements for the year ended 31 March 2019 are the first financial statements of the Company under Ind AS. Reconciliations and descriptions of the effect of the transition has been summarised in Note 34,

2.1) SIGNIFICANT ACCOUNTING POLICIES

(a) Current Vs Non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

(b) Property, plant and equipment

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognised as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses if any. Cost directly attributable to acquisition are capitalised until the property, plant and equipment are ready for use, as intended by the management.

Subsequent costs are capitalised on the carrying amount or recognised as a separate asset, as appropriate, only when future economic benefits associated with the item are probable to flow to the Company and cost of the item can be measured reliably. When significant parts of property, plant and equipment are required to be replaced in regular intervals, the Company recognises such parts as separate component of assets. All repair and maintenance are charged to statement of profit and loss during the reporting period in which they are incurred.

The present value of the expected cost for the decommissioning of the asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit and loss on the date of disposal or retirement.

Depreciation on property, plant and equipment is provided on a written down value basis over the estimated useful lives of the assets as below:

Assets	Useful Lives
Office Equipment	5 Years
Furniture and fixtures	10 Years
Vehicles	8 Years
Computer and Components	3 Years
Plant and Machinery	15 Years

When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet is classified as capital advances under the non-current assets and the cost of assets not put to use before such date are disclosed under 'Capital work in progress'.

(c) Intangible assets

On transition to Ind AS, the Company has elected to continue with the carrying value of its intangible asset recognised as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the intangible asset.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as finite as stated below and the assets are amortised over their useful lives and assessed for impairment whenever there is an indication that an intangible asset may be impaired.

Assets	Useful Lives
Computer software	over license period subject to maximum limit of 3 years

The amortization period and the amortization method are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

(d) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses, including impairment on inventories, are recognised in the statement of profit and loss.

(e) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)

Equity instruments measured at fair value through other comprehensive income (FVTOCI)

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is most applicable to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the Effective Interest Rate ("EIR") method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is considered only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss. This category is applicable to investments in mutual funds.

Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company

recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to statement of profit and loss (P&L). Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the Elk method.

Equity Investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to statement of profit and loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value. All changes in fair value including dividend are recognized in the statement of profit and loss.

De-recognition

A financial asset is de-recognised only when

- The rights to receive cash flows from the asset have expired, or
- Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset 'or has entered into a pass-through arrangement it evaluates if and to what extent it has retained the risks and rewards of ownership.

When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109.

Gains or losses on liabilities held for trading are recognised in the statement of profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to statement of profit and loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss.

Loans and Borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the EIR. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the ER. The EIR amortisation is included in finance costs in the statement of profit and loss.

Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

De-recognition

A financial liability' is derecognised when the obligation under the liability is discharged or cancelled or expires when an existing financial liability is replaced by another from the same lender on substantially different terms, the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest

Offsetting financial instruments

Financial asset and financial liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Derivative financial instrument

The Company uses derivative financial instruments i.e., forward and futures currency contracts to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss. The Company has not applied hedge accounting.

Fair value Measurement

The Company measures its financial instruments such as derivative at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

In the principal market for the asset or liability, or

In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1- Quoted (Unadjusted) marked prices in the active markets for identical assets or liabilities

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re -assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re measured or reassessed as per the Company's accounting policies. For this analysis, the management or its expert verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents

(f) Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- Traded goods: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in first out basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

(g) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized.

Sale of Goods

Revenue from sale of goods is recognized when the significant risk and rewards of ownership of the goods have been passed to the buyer which generally coincides with delivery of goods, as per the contractual terms with customers. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and is inclusive of excise duty and not of returns and allowances, trade discount, volume rebates and value added taxes. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

The Company accounts for volume discount for pricing incentives to customers as a reduction of revenue based on estimate of applicable discount/ incentives.

(h) Foreign currencies

- Functional and presentation currency :-items included in the financial statements of the Company are measured using the currency of the primary economic environment in which it operates is. the “functional currency”. These financial statements are presented in Indian rupees, which is also the functional currency of the Company.
- Transactions and balances :-Foreign currency transactions were recorded in functional currency at the exchange rates prevailing at the date of transaction. Exchange differences arising on settlement of transactions, are recognised as income or expense in the year in which they arise.

At the balance sheet date, all monetary items denominated in foreign currency, are reported at the exchange rates prevailing at the balance sheet date and the resultant gain or loss is recognised in the statement of profit and loss. Nonmonetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

(I) Income taxes**Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in India.

Current income tax relating to items recognised outside statement of profit and loss is recognised either in other comprehensive income or in equity. Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Payments of tax as per Minimum Alternative Tax (MAT) is included as part of current tax in statement of profit and loss.

Deferred Income Tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements as at reporting date. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax relating to items recognised outside statement of profit and loss is recognised either in other comprehensive income or in equity. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

(j) Provisions and Contingent Liabilities**Provisions**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingencies

A contingent liability is a possible obligation that arises from past events whose existence will be continued by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

(k) Earnings per share

Basic EPS amounts are calculated by dividing the profit or loss for the year attributable to equity holders of the Company by the weighted average number of Equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit or loss attributable to equity holders of the Company (after adjusting the corresponding income/charge for dilutive potential equity shares) by the weighted average number of Equity shares outstanding during the year plus the Weighted average number of Equity shares that would be issued on conversion of all the dilutive potential Equity shares into Equity shares.

(l) Borrowing costs

Borrowing costs to the extent directly attributable to the acquisition/construction of assets that necessarily take substantial period of time to get ready for their intended use are capitalised along with the respective property, plant and equipment up to the date such asset is ready for use. Other borrowing costs are charged to the statement of profit and loss.

(m) Cash and cash equivalents

Cash and cash equivalent in the balance sheet and for the purpose of statement of cash flows comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. These do not include bank balances earmarked /restricted for specific purposes.

Bank borrowings in form of cash credits are considered to be component of cash and cash equivalents for the purpose of statement of cash flows since these are repayable on demand.

2.2 Significant accounting estimates, assumptions and judgements

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities.

Uncertainty about these estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that seem to have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(i) Contingencies

Management judgement of contingencies is based on the internal assessments and opinion from the consultants for the possible outflow of resources, if any.
